

Arsh Ahmad

Full Stack Engineer

arshahmadhdi@gmail.com | +91-8448214808 | linkedin.com/in/btwitsarsh | btw-itsarsh.in

Summary

Full Stack Engineer with 5+ years building and shipping scalable, high-performance web applications. Deep expertise in React, TypeScript, JavaScript, HTML, CSS, and Redux, with hands-on backend experience in Node.js, Express, and REST APIs across MongoDB, PostgreSQL, and Redis. Owns features end to end — from technical design through development, testing, deployment, and monitoring — with a strong focus on performance, reliability, scalability, and security. Experienced integrating AI/LLM APIs and using AI coding assistants and agentic workflows (Claude, Cursor) to boost engineering productivity, and comfortable in Agile teams with Git and CI/CD. Also mentor junior engineers and lead code reviews.

Skills

Frontend: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux, Redux-Saga, Context API, Next.js, Tailwind CSS, Reusable Component Libraries

Backend: Node.js, Express, REST APIs, Frontend–Backend Integration, WebSockets, Authentication & Authorization

Databases: MongoDB, PostgreSQL, Redis, IndexedDB

Architecture & Quality: Frontend Architecture, Performance Optimization, Scalability, Reliability, Security Best Practices, Responsive & Accessible UI, Distributed / Real-Time Systems

Testing: Integration Testing, End-to-End & UI Testing

AI Engineering: AI / LLM API Integration, Claude, Cursor, Agentic Workflows, Prompt Engineering

Cloud & DevOps: AWS (S3, Amplify), CI/CD, Git, GitHub, GitLab, Bitbucket, Kubernetes (k9s), Agile / Scrum

Tools: JIRA, Figma, Postman

Professional Experience

Devslane (Escecion Technologies Pvt. Ltd.) — Noida, India

Software Engineer (Full Stack)

Aug 2021 – Present

AI-Enabled Learning Platform — EdTech

- Owned features end to end on an AI-enabled React and TypeScript platform — from technical design through development, testing, deployment (Kubernetes via k9s), and monitoring.
- Integrated AI/LLM capabilities: wired up AI4Bharat text-to-speech APIs for multilingual audio, and built custom Claude skills and agentic workflows to accelerate development and testing.
- Built the milestone-and-rewards progression UI with optimistic updates and a schema-driven question renderer that ships new question formats without new UI code.
- Designed and built REST APIs (Node.js, Express, MongoDB) and frontend–backend integrations powering core learner workflows, and reduced database load through targeted Redis caching.
- Improved performance and reliability via code splitting, lazy loading, memoization, virtualization, and an offline-first IndexedDB layer with background synchronization.

Property Management & Booking Platform — PropTech / SaaS

- Built React and Redux-Saga dashboards and a real-time booking-synchronization UI for a platform handling 5,000+ monthly bookings, and improved API performance by up to 35% via Redis caching.
- Integrated real-time marketplace webhooks (Airbnb, VRBO) into PostgreSQL and developed REST APIs and schemas in Node.js and Express.
- Reduced page load times by up to 40% through code splitting, lazy loading, and rendering optimization.

Software Engineer Intern (Part-Time)

Feb 2019 – Jul 2021

Real-Time Social Networking Platform — Social

- Built real-time social features (posting, commenting, sharing) over WebSockets with optimized Redux state for high interaction volume, and developed supporting REST APIs in Node.js and Express.
- Engineered reusable, scalable React components and resilient reconnection handling for live updates.

Offline-First Field Inspection PWA — Enterprise

- Built an offline-first Progressive Web App with auto-sync on reconnect, enabling reliable data capture in no-connectivity field environments.
- Implemented complex multi-step forms (Formik) with dynamic validation, conditional fields, and reusable schemas on a reusable component architecture, cutting new-form development time by 20%.

Education

Bachelor of Technology — Information Technology

2017 – 2021

Ajay Kumar Garg Engineering College, Ghaziabad

CGPA: 8.3
